Biochemistry of Foods, Second Edition

N.A. Michael Eskin

Biochemistry of Foods, Second Edition N.A. Michael Eskin

Since the first edition was published there have been a number of introductory texts in food chemistry/biochemistry. This book, however, has stayed unique as it approaches the subject in far more detail and from the in vivo perspective. Written as a text for upper level undergraduates, this second edition builds upon the first in presenting state-of-the-art research in food science.

Key Features

- * Expanded coverage and more recent findings incorporated in response to user comments
- * Incorporates latest research results in concise integrated form
- * Incorporates major breakthroughs in food science knowledge: ethylene biosynthesis, non-enzymatic browning and cleaning enzymes for better use
