### **BOOK #1 PREVIEW**

All of us are looking for great beauty products that can help make ourselves look better, and our skin shine. There are so many beauty products out there that you can use, and you might be wondering what is best. The truth is, there are some that are better than others, and some that work better than others and it's important to know about them. Many times, we end up getting suckered into using the wrong beauty products, and sometimes our efforts are useless, causing us to just waste money on items that we need.

### **BOOK #2 PREVIEW**

People trust nature because nature works. We are a part of nature and as such, it will always have a way for us to heal and fight off whatever infections may plague us. It is difficult for modern medicine to boast the same thing, especially because most of it is experimental. We are used and treated as guinea pigs for pills and procedures that aren't guaranteed to help us and have a huge slew of side-effects. Not only is this unsafe, but it is the exact opposite of healing.

## **BOOK #3 PREVIEW**

Essential oils are important, especially if you are trying to keep your home and body free of dangerous chemicals and cleaners. These oils are miraculous and their benefits are unending. The best part about them is how comfortable it feels to use substances naturally found in the world around us and not rely on chemically altered products made by flawed people who sometimes care more about money and commissions than our health and wellness.

## **BOOK #4 PREVIEW**

Each culture in the world brings its own particular traditions and ideas and stories when it comes to the theme of health and wellness. In the past, many people in the United States considered these remedies to be folklore, old wives tales, and overall ineffective remedies. We became reliant on medication for everything and less focused on the effects of the chemicals that we were putting in our bodies. Everything was processed, sterilized and pasteurized and preserved for our safety.

## **BOOK #5 PREVIEW**

I am tired of relying on pharmaceuticals and chemicals to deal with every day common illness, from a cold to a headache to high blood pressure. Every medication we use, no matter how common or well-researched, comes with intended and unintended effects. Some of these effects, such as the intended effects, are desired, like pain relief when taking pain relief medication. The problem is the unintended effects these medications cause in the body. I am not a doctor or a pharmacist, but I tend to rely on my common sense.

## **BOOK #6 PREVIEW**

Healing with essential oils isn't something that is commonly considered possible. Although it seems like it is unlikely to work and wouldn't be something the typical scientist would recommend to treat any ailments, ancient people have been using oils for at least as long as the Biblical days in order to uplift the body and heal the spirit. All of the general uses of essential oils seem to be lost on modern medicine, but there are people today who are more than willing to share their insight on the healing benefits of ancient essential oils.
