Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series)

This book is the first to directly address the question of how to bridge what has been termed the "great divide" between the approaches of systems developers and those of social scientists to computer supported cooperative work--a question that has been vigorously debated in the systems development literature. Traditionally, developers have been trained in formal methods and oriented to engineering and formal theoretical problems; many social scientists in the CSCW field come from humanistic traditions in which results are reported in a narrative mode. In spite of their differences in style, the two groups have been cooperating more and more in the last decade, as the "people problems" associated with computing become increasingly evident to everyone.

The authors have been encouraged to examine, rigorously and in depth, the theoretical basis of CSCW. With contributions from field leaders in the United Kingdom, France, Scandinavia, Mexico, and the United States, this volume offers an exciting overview of the cutting edge of research and theory. It constitutes a solid foundation for the rapidly coalescing field of social informatics.

Divided into three parts, this volume covers social theory, design theory, and the sociotechnical system with respect to CSCW. The first set of chapters looks at ways of rethinking basic social categories with the development of distributed collaborative computing technology--concepts of the group, technology, information, user, and text. The next section concentrates more on the lessons that can be learned at the design stage given that one wants to build a CSCW system incorporating these insights--what kind of work does one need to do and how is understanding of design affected? The final part looks at the integration of social and technical in the operation of working sociotechnical systems. Collectively the contributors make the argument that the social and technical are irremediably linked in practice and so the "great divide" not only should be a thing of the past, it should never have existed in the first place.

From reader reviews:

Charles Cushman:

The book Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series) gives you the sense of being enjoy for your spare time. You need to use to make your capable far more increase. Book can being your best friend when you getting anxiety or having big problem along with your subject. If you can make examining a book Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series) for being your habit, you can get more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You are able to know everything if you like start and read a reserve Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series). Kinds of book are a lot of. It means that, science e-book or encyclopedia or others. So , how do you think about this reserve?

Ruth Barnett:

The knowledge that you get from Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series) could be the more deep you excavating the information that hide in the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to be aware of but Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series) giving you enjoyment feeling of reading. The article author conveys their point in a number of way that can be understood by anyone who read the item because the author of this publication is well-known enough. This book also makes your personal vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having that Social Science, Technical Systems, and Cooperative Work: Beyond the Great Divide (Computers, Cognition and Work Series) instantly.

David Giles:

Spent a free a chance to be fun activity to complete! A lot of people spent their spare time with their family, or their friends. Usually they undertaking activity like watching television, gonna beach, or picnic from the park. They actually doing ditto every week. Do you feel it?
