Construction Program Management - Decision Making and Optimization Techniques

Ali D. Haidar

Construction Program Management - Decision Making and Optimization Techniques Ali D. Haidar
Exploring complex and intelligent analytical and mathematical methods, this book examines how different approaches can be used to optimize program management in the construction industry. It presents an in-depth study of the different program management methods, ranging from simple decision-making techniques and statistics analysis to the more complex linear programming and demonstrates how knowledge-base systems and genetic algorithms can be used to optimize resources and meet time, budget and quality criteria. It addresses topics including decision-making principles, planning and scheduling, mathematical forecasting models, optimization techniques programming and artificial intelligence techniques. Providing a valuable resource for anyone managing multiple projects in the construction industry, this book is intended for civil and construction engineering students, project managers, construction managers and senior engineers.

From reader reviews:

Orlando Hernandez:

With other case, little individuals like to read book Construction Program Management - Decision Making and Optimization Techniques. You can choose the best book if you want reading a book. Provided that we know about how is important some sort of book Construction Program Management - Decision Making and Optimization Techniques. You can add expertise and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can understand everything! From your country until eventually foreign or abroad you will find yourself known. About simple factor until wonderful thing you are able to know that. In this era, we can easily open a book as well as searching by internet gadget. It is called e-book. You may use it when you feel weary to go to the library. Let's go through.

Ronald Hill:

Here thing why that Construction Program Management - Decision Making and Optimization Techniques are different and reputable to be yours. First of all reading through a book is good but it depends in the content of the usb ports which is the content is as yummy as food or not. Construction Program Management - Decision Making and Optimization Techniques giving you information deeper and in different ways, you can find any publication out there but there is no e-book that similar with Construction Program Management - Decision Making and Optimization Techniques. It gives you thrill looking at journey, its open up your eyes about the thing that happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your technique home by train. For anyone who is having difficulties in bringing the published book maybe the form of Construction Program Management - Decision Making and Optimization Techniques in e-book can be your substitute.

Jason Carr:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The info you get based on what kind of book you read, if you want drive more knowledge just go with training books but if you want really feel happy read one having theme for entertaining such as comic or novel. The actual Construction Program Management - Decision Making and Optimization Techniques is kind of reserve which is giving the reader erratic experience.

Sidney Robertson:

Is it an individual who having spare time subsequently spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Construction Program Management - Decision Making and Optimization Techniques can be the reply, oh how comes? The new book you know. You are so out of date, spending your time by reading in this completely new era is common not a nerd

activity. So what these publications have than the others?
