Multivariate Analysis: Methods and Applications

William R. Dillon, Matthew Goldstein

Multivariate Analysis: Methods and Applications William R. Dillon, Matthew Goldstein

A practical methods book providing complete, up-to-date non-technical guidance to multivariate methods. The emphasis is on real data, examples, and computer programs along with an integration of theory and application. Treats special topics, such as multidimensional scaling, cross-classified categorical data, latent structure analysis, and LISREL (linear structural relations).
