Although most books about seduction are written specifically for men or women, this makes the difference, as it explains how the rules of seduction apply equally for both in different contexts of reality. Therefore, it represents an opportunity to study the basics of any kind of technique in this field.

What's here referred as "he" or "she", can always be exchanged between genders, as everything can be adapted according to the situation and the persons involved.

The purpose of the study presented is the observation of dynamics in relationships, with an understanding of how one thing leads to another, namely, seduction and sex, or communication and love.

While showing the rules of the whole game of seduction, the knowledge provided here, guides the reader towards finding an ideal partner, and live a relationship where positive feelings and experiences can be shared among two lovers.
