Gene Watson Flying Saucers: The Work Of Inventor Gene Watson Stephen Watson

This book details the "generalized propulsion" sketches of Italian American inventor Gene Watson who had a fascination with flying saucers. Gene Watson claims his concepts may be responsible for some of today's UFO sightings as America secretly perfected his designs that have never been revealed before to the public until now! Learn about AC ionic thrust (with lab photo examples), cascade burning rockets, cyclotronic rockets, hypersonic jets, gear reduction flying saucers, plasma, nuclear fusion, and much much more! There's even a human flapping wing design that Gene Watson claims will work! Gene Watson is a modern day Leonardo da Vinci who was way ahead of his time encompassing the spirit of the Wright brothers in trying to build a real working flying saucer. He even attracted the attention of Ross Perot during the 1980s and DARPA before he had to flee the country and permanently move back to his native land Italy. Examples of his flying saucer designs are exclusively inside this book. You will not read about Gene Watson's inventions anywhere else! There is even a science glossary to help you better understand Gene Watson's propulsion concepts. A great educational resource.
