ISO/IEC JTC 1/SC 33

## ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element ISO/IEC JTC 1/SC 33

This Recommendation | International Standard is intended for reference by other specifications when the functionality of commitment, concurrency and recovery is required. It can be referenced whenever the processing of two or more application-entity invocations in a distributed application needs to be organized into an atomic action. This Recommendation | International Standard defines services that are used on a single association to coordinate two application-entity invocations involved in an atomic action. The determination of which application-entity invocations are involved in an atomic action is not within the scope of this Recommendation | International Standard. This Recommendation | International Standard establishes the general principles for the coordinated use of the CCR services when more than two application-entity invocations are involved in a single atomic action, or when recovery is required after failure. The coordination of multiple associations and the related application-entity invocations that constitute an atomic action is achieved by a referencing specification in conjunction with this Recommendation | International Standard. This Recommendation | International Standard is only applicable to a distributed application whose specification references this Recommendation | International Standard. This Recommendation | International Standard does not specify individual implementations or products. It does not constrain the implementation of entities and interfaces within a computer system. No requirement is made for conformance to this Recommendation | International Standard. This Recommendation | International Standard includes requirements for compliance that apply to a referencing specification. The CCR service defined in this Recommendation | International Standard requires that CCR Protocol Version 2 (or a later version) is being used.

**From reader reviews:**

**Linda Pillar:**

The guide untitled ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element is the e-book that recommended to you to read. You can see the quality of the book content that will be shown to an individual. The language that author use to explained their ideas are easily to understand. The article author was did a lot of exploration when write the book, and so the information that they share for you is absolutely accurate. You also can get the e-book of ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element from the publisher to make you a lot more enjoy free time.

**Daniel Weimer:**

As we know that book is very important thing to add our know-how for everything. By a reserve we can know everything we really wish for. A book is a set of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This publication ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element was filled about science. Spend your extra time to add your knowledge about your science competence. Some people has different feel when they reading any book. If you know how big advantage of a book, you can experience enjoy to read a reserve. In the modern era like at this point, many ways to get book you wanted.

**Marina Tijerina:**

A lot of guide has printed but it is unique. You can get it by internet on social media. You can choose the very best book for you, science, comedy, novel, or whatever by searching from it. It is named of book ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element. You can add your knowledge by it. Without leaving the printed book, it may add your knowledge and make you actually happier to read. It is most significant that, you must aware about publication. It can bring you from one destination to other place.

**John Martin:**

Book is one of source of knowledge. We can add our expertise from it. Not only for students and also native or citizen require book to know the revise information of year for you to year. As we know those textbooks have many advantages. Beside many of us add our knowledge, also can bring us to around the world. From the book ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element we can acquire more advantage. Don't that you be creative people? For being creative person must want to read a book. Only choose the best book that

suitable with your aim. Don't always be doubt to change your life at this book ISO/IEC 9804:1998, Information technology - Open Systems Interconnection - Service definition for the Commitment, Concurrency and Recovery service element. You can more attractive than now.
