An Equation That Changed the World: Newton, Einstein, and the Theory of Relativity Harald Fritzsch
Fritzsch offers readers the opportunity to listen in on a meeting of Isaac Newton, Albert Einstein, and a present-day physicist. While he introduces the theory of relativity, Fritzsch teaches its sources, its workings, and the ways it has revolutionized our view of the physical world. *An Equation That Changed the World* dramatizes the importance of relativity, for the human race, and the survival of our planet.

"Fritzsch could not give the modern reader a more memorable introduction to the personalities and science of Isaac Newton and Albert Einstein unless somehow he could find the keys to H. G. Wells' time machine. . . . Many readers will applaud Fritzsch for this lively but profoundly insightful book." —*Booklist*, starred review

"[Fritzsch] has dreamed up a dialogue between the two great physicists, helped along by a fictional modern physicist. . . . The conversation builds up to an explanation of $E=mc^2$, and on the way illuminates the important points where Newtonian and Einsteinian theory diverge." —David Lindley, *New York Times Book Review*
