Atlas of Human Anatomy and Surgery

Jean-Marie Le Minor, Henri Sick

Atlas of Human Anatomy and Surgery Jean-Marie Le Minor, Henri Sick
Anatomically correct: Bourguery's monumental and unsurpassed treatise

We owe a great debt to Jean Baptiste Marc Bourguery (1797–1849) for his *Atlas of Anatomy*, which was not only a massive event in medical history, but also remains one of the most comprehensive and beautifully illustrated anatomical treatises ever published in any language. In 1830, having received his doctorate in medicine three years prior, Bourguery began work on his magnificent atlas in cooperation with illustrator Nicolas Henri Jacob (1782–1871), a student of the French painter Jacques Louis David. The first volumes were published the following year, but completion of the treatise required nearly two decades of dedication; Bourguery lived just long enough to finish his labor of love, but the last of the treatise's eight volumes was not published in its entirety until five years after his death.

The four parts of Bourguery's treatise cover descriptive anatomy, surgical anatomy and techniques (exploring in detail nearly all the major operations that were performed during the first half of the 19th century), general anatomy and embryology, and microscopic anatomy. Jacob's spectacular hand-colored, life-size lithographs are remarkable for their clarity, color, and aesthetic appeal, reflecting a combination of direct laboratory observation and illustrative research; the images are to this day unsurpassed in anatomical illustration. This reprint includes the complete color plates—726 in total—and will finally allow not only those in the medical field but also artists, students, and anyone interested in the study of the human body to appreciate this important historical work.

Text in English, French, and German
