Buddha's Neuronet for Levitation (Fireside Series, Vol. 2, No. 4) Ramtha

Part of Ramtha's Fireside Series collection library on the topic of Buddha's teachings and the art of levitation. We have just discussed the viable science of levitation that allows you, as a heavy three-dimensional object vibrating according to the hertz of the planet, to have the same stability as mass itself. If suddenly you were to change your field, then the mass that you are made up of would change as well. You would still be you but you would be vibrating at another frequency. By doing that then you would still be in the world but not of the world. In other words, we can see you and you are still John Doe, but you are not in the world because you are no longer obeying the laws of gravity and physics here. So you are actually levitating fifteen feet above the floor. We can see you but you are eating the surrounding time in this time. And while you are sitting there, you are actually in the future. You are in another dimension of time that will one day be your linear future. Ramtha
