Urban Air Quality Management: Coordinating Transport, Environment, and Energy Policies in Developing Countries (World Bank Technical Papers) Magda Lovei, Masami Kojima

'Urban Air Quality Management' examines the contribution of vehicles to urban air pollution which is a growing problem in many cities in developing countries. It evaluates the priorities for air quality management programs, and reviews national, municipal, and World Bank experience with pollution-reduction efforts. This book draws lessons from this assessment and offers recommendations for priorities in developing coordinated assistance strategies in the environment, urban transport, and energy sectors.
