## **Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golombic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science)**

Martin Charles Golombic has been making seminal contributions to algorithmic graph theory and artificial intelligence throughout his career. He is universally admired as a long-standing pillar of the discipline of computer science. He has contributed to the development of fundamental research in artificial intelligence in the area of complexity and spatial-temporal reasoning as well as in the area of compiler optimization. Golombic's work in graph theory led to the study of new perfect graph families such as tolerance graphs, which generalize the classical graph notions of interval graph and comparability graph. He is credited with introducing the systematic study of algorithmic aspects in intersection graph theory, and initiated research on new structured families of graphs including the edge intersection graphs of paths in trees (EPT) and trivially perfect graphs.

Golombic is currently the founder and director of the Caesarea Edmond Benjamin de Rothschild Institute for Interdisciplinary Applications of Computer Science at the University of Haifa. He also served as chairman of the Israeli Association of Artificial Intelligence (1998-2004), and founded and chaired numerous international symposia in discrete mathematics and in the foundations of artificial intelligence.

This Festschrift volume, published in honor of Martin Charles Golombic on the occasion of his 60th birthday, contains 20 papers, written by graduate students, research collaborators, and computer science colleagues, who gathered at a conference on subjects related to Martin Golombic's manifold contributions in the field of algorithmic graph theory and artificial intelligence, held in Jerusalem, Tiberias and Haifa, Israel in September 2008.

### **From reader reviews:**

#### **Harold Froelich:**

Do you one of people who can't read pleasurable if the sentence chained from the straightway, hold on guys this particular aren't like that. This Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science) book is readable by simply you who hate those perfect word style. You will find the details here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to provide to you. The writer involving Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science) content conveys objective easily to understand by many individuals. The printed and e-book are not different in the content material but it just different available as it. So , do you nonetheless thinking Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science) is not loveable to be your top collection reading book?

#### **Steven Atkins:**

This book untitled Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science) to be one of several books which best seller in this year, that is because when you read this publication you can get a lot of benefit into it. You will easily to buy this particular book in the book store or you can order it via online. The publisher with this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Cell phone. So there is no reason for your requirements to past this guide from your list.

#### **Kenneth Jordan:**

Spent a free time and energy to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, likely to beach, or picnic from the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? May be reading a book might be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the reserve untitled Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science) can be great book to read. May be it might be best activity to you.

#### **Jose Chapman:**

Your reading sixth sense will not betray an individual, why because this Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th

Birthday (Lecture Notes in Computer Science) reserve written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written within good manner for you, leaking every ideas and publishing skill only for eliminate your hunger then you still uncertainty Graph Theory, Computational Intelligence and Thought: Essays Dedicated to Martin Charles Golumbic on the Occasion of His 60th Birthday (Lecture Notes in Computer Science) as good book not merely by the cover but also through the content. This is one guide that can break don't judge book by its deal with, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading sixth sense already alerted you so why you have to listening to a different sixth sense.
